

STATEMENT FIVE

FROM TASHRUL

Leader of the Organic Resistance

THIS MESSAGE IS ADDRESSED TO THE CITIZENS OF THE ASSOCIATION OF FREE WORLDS (AOFW):

The Andromedans are a species of advanced mechanical intelligence from a distant galaxy, intent on dominating and/or destroying all “organic life” in the cosmos. Their murderous mission has lasted over many hundreds of years as they purge the universe of what they consider “imperfection.” [\[Link to previous statements for background.\]](#)

The Andromedans pose a threat to all life in our galaxy. This is not debatable. It is not in doubt. They will not discriminate. They intend to do in this galaxy what they have done in countless others: remove all that they consider “imperfection.” This includes all sentient and sapient life in our galaxy.

BioResearch has knowingly and willingly allied itself with the Andromedans. The reason for this partnership is simple: it is profitable. Using Andromedan technology to create their “Little Buddy” implants, BioResearch is assisting the Andromedans in amassing an army of human-android hybrids. BioResearch officials have misled the public regarding the safety of these implants, leaving many the unknowing victims of a potentially life-threatening condition. [\[Link to BioResearch dossier, including patient testimonials and Little Buddy technical details.\]](#)

Several world leaders are suspected of collaboration with the Andromedan enemy. BioResearch has actively promoted the installation of Andromedan implants into government officials, with or without the victims’ permission and knowledge. The exact number of compromised individuals and the depth of their penetration into the AOFW government is under investigation. [\[Link to evidence against governor and other officials.\]](#)

In order to achieve their cynical profiteering, BioResearch has even employed wanted criminals such as Harry Mudd, who was enabling the Andromedan invasion from a facility on New New Aberdeen. BioResearch also enabled mass murder by the Andromedans on at least one world, and may be attempting further genocides under the cover of BioResearch genetics research and development. [\[Link to Harry Mudd dossier, along with footage and mission report of raid on New New Aberdeen facility.\]](#)

The Andromedan threat is greater than any threat the AOFW has ever faced. The Organic Resistance has encountered Andromedan presence or influence on more than a dozen Triangle worlds. We have exposed Andromedan influence within the Federation as well. We have discovered evidence suggesting the Andromedans are active in Romulan and Klingon space as well.

The enemy has deeply penetrated our territories and has surreptitiously begun undermining our planetary governments. The government of Comstock has been wholly compromised by the

Andromedan enemy, a fate we do not wish to see occur on any other worlds, especially those of the AOFW.

If we do not act now, we will soon find ourselves dealing with a population of implanted citizens who can be “switched on” by the Andromedans and forced to participate in the destruction of their own kind. History tells us that such an “enemy within” is almost impossible to defeat.

As with any war, there have been casualties on both sides. Any loss of any life is regrettable, but it is one of the unfortunate realities of warfare. The Andromedans have proven themselves capable of great savagery, murdering hundreds of citizens on Comstock once their secret implant operations were exposed.

The Organic Resistance is dedicated to the defeat of the Andromedans, by any means necessary. We will not allow this enemy to undermine and destroy our way of life. Our numbers are growing. We will continue the fight.

As long as BioResearch or other entities cooperate with the Andromedans, we will consider them enemies as well. Their facilities will be targeted and destroyed. Accusations of “terrorism” mean little from a company participating in interplanetary genocide, and parroted claims from their media puppets mean even less.

While we will attempt to minimize casualties in our efforts, those employed by our enemies should recognize the danger they now face. If they are not moved by the immoral nature of their work, perhaps an immense threat to their personal safety will be motivation to pursue a new career path.

It is my hope that the governments of our galaxy will soon realize the threat posed and band together in common cause against the Andromedan threat. Both tactically and historically, it is the goal of a movement such as ours to achieve this awakening. We are a small group who are in no way powerful enough to defeat a galaxy-wide threat such as the Andromedans. If we do not prevail in our attempt to awaken and unify the galactic governments, then we will have failed, even if we destroy dozens of facilities and thousands of Andromedans.

Join us and together we can defeat these machines who seek to destroy all life.

Remember: ***You are the Resistance!***
